DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/11/2009 has been entered.

Information Disclosure Statement

The information disclosure statements (IDS) submitted on 06/11/2009 and 06/12/2009 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are considered by the examiner.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 11, 16-29 are allowed. The prior art of record does not teach the claimed invention, as follows.

For each of independent claims 11, 16 and 20, the prior art does not teach or render obvious the followings:

“calculating a bandwidth contribution of said target access port to said VLAN includes: splitting said VLAN into two portions based on the location of said VLAN switches relative to said target trunk, wherein one portion includes said target access

Art Unit: 2452

port and is an access port side and the other portion is a non-access port side; calculating a current access port side bandwidth requirement responsive to said VLAN; calculating a potential access port side bandwidth requirement responsive to said VLAN and to said target access port; calculating a current non-access port bandwidth requirement responsive to said VLAN; and determining said bandwidth contribution of said target access port by subtracting the minimum of said current access port side bandwidth requirement compared to said current non-access port bandwidth requirement from the minimum of said potential access port side bandwidth requirement compared to said current non-access port bandwidth requirement".

The claimed limitations above provides a method/system for VLAN capacity requirement estimation, wherein a bandwidth contribution of a target access port is calculated based on a least contribution algorithm to reflect an impact of provisioning an access port with respect to a trunk capacity, taking into account bandwidth of the port, class of service of the VLAN and placement of the port within the VLAN.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hieu T. Hoang whose telephone number is 571-270-1253. The examiner can normally be reached on Monday-Thursday, 8 a.m.-5 p.m., EST.
